

# What You Need To Know About Trauma Informed Care

**\*\*\*FREE TRAINING\*\*\***

- One out of every 4 children attending school has experienced one or more traumatic events in their life that can affect learning and/or behavior, and set the child up for lifelong mental health problems, substance abuse, and involvement in the juvenile justice system.
- While it is true that schools are set up for teaching and learning, learning can not happen when a child's brain is hijacked by traumatic stress and can't take in, or process information.
- Teachers can't effectively impart information to a class of students when traumatic stress has caused a child to become so dysregulated that their behavior is disruptive or uncontrollable.

This **FREE** full day workshop will focus on helping school personnel and others who work closely with children, understand trauma and its aftermath with the goal of helping affected students feel safe and nurtured and enable them to learn and thrive despite the challenges they may face in their homes or neighborhoods.

# 12/09/16

Registration begins at 8:30 (Breakfast will be served)  
9:00 a.m. -3:00 p.m. (Lunch will be provided)

**Presenter: Donna Amundson, LCSW**

Donna Amundson, is the Executive Director of the Genesis Training Institute and has over 30 years of field experience as a clinical social worker. She specializes in psychological trauma interventions, traumatic grief, and suicidology. Ms. Amundson is one of the Senior Program Managers for the International Trauma Center (ITC). She is also a Master Trainer for the Training Institute for Suicide Assessment and Clinical Interviewing (TISA) for which she provides national and international certification trainings for clinicians in the Chronological Assessment of Suicide Events (CASE) Approach. Ms. Amundson was employed for 27 years at the University of Medicine and Dentistry, University Behavioral HealthCare (now Rutgers University) where she was TLC Program Manager; she also created a statewide trauma response network that continues to provide posttraumatic stabilization for youth in schools and communities in the aftermath of suicide, homicide, accidents, and larger disasters.
